PROJECTS

SyncTunes - Collaborative Music Sharing — (React, ExpressJs, WebSockets) : SyncTunes lets users create or join music rooms for synchronized listening. The room creator controls song selection, playback, and volume, ensuring a shared music experience for all participants. ([link](#))

Apes Far From Home — (React, NextJs, ThreeJs, GSAP, Tailwind CSS) : Apes Far From Home is a creative NFT project featuring 9,999 unique 2.5D digital apes. As a Full Stack Developer at LBS Visual FX, I was responsible for building and maintaining the project's official website. ([link](#))

Chess.com — (React, NodeJs, WebSockets) : An online two-player chess game with real time move synchronization. Players can create rooms as White or Black, and others can join using a unique room key. ([link](#))

Aroma Alike — (MERN Stack, Tailwind CSS) : Aromaalike is a web application developed to help users discover perfumes with similar fragrances. Users can choose a fragrance they like, and the platform suggests comparable alternatives, making it easier to explore new perfumes that match their preferences. ([link](#))

Goto Resource — (MERN Stack) : This was my First MERN project, which routes people to the best online available resources to learn Tech Skills for free of cost. ([link](#))

Google's Clone — (HTML, CSS, Java Script) : This was a clone of the Google.com home page, it also allows us to search and explore things. ([link](#))

PUBG Mobile — (HTML, CSS) : My First Webpage - The Beginning of My Web Dev Journey, Landing page of PUBG Mobile. ([link](#))

ACHEIVEMENTS

Hacktober Fest - An open source technical fest where I have contributed to global level open source projects and won swags.

Leet Code - 2200+ rating, solved 800+ DSA Problems, 15+ Badges and won Leetcode swags.
